

Area of Application

ESSVE Construction Screw ET-T designed for joining pieces of timber, construction timber, glulam, etc. indoors and outdoors. When using ESSVE ET-T construction screws outdoors the timber needs to be dry and frost free.

Description

The screw is equipped with one fibre cut at the point which reduces the drive-in torque and minimises splitting. Manufactured of hardened carbon steel and C4 classified surface treatment Silver CorrSeal. The screw conforms to the CE requirement as per

EN14592.

Installation

Use ESSVE's specific system bits for a safe installation. Fit the system bits without the a bit adapter directly in the chuck. Consequently, screw installation must take place at a constant torque without stopping.

Use a strong power driver for the best installation. A power screwdriver with variable speed control is recommended when installing in hard woods.

Recommended rpm: 250-800/min.

CorrSeal

ESSVE CorrSeal surface treatment.

Type approved by SITAC No. 0075/05

Specification

Material	Hardened steel SAE C10B21
Surface treatment	Silver CorrSeal
Corrosion categories	C4

Construction screw ET-T, CorrSeal
