

## Installation tool HDS

### Description

Installation tool for concealed installation in decking timber.

It is important to follow the timber supplier's installation instruction, in terms of joist spa-

cing and the distance between each decking board, to optimise the longevity of your terrace. The legs that are clamped over the decking board during installation give a space between each decking board.

### Packages

Item no.	Description	Description	Qty/pack.
701501	HDS 3,5 MON-TERINGS-VERKTYG 85-110	Installation tool 3.5 mm incl. 2 x TX15 x 65 mm bit	1
